

Meta Vision Systems

Welding with Vision

Meta Vision Systems Ltd is a leading manufacturer of laser vision systems for welding applications worldwide. Our weld seam tracking and process control systems are widely applied throughout manufacturing.

3-D CAD offers Meta Vision Systems the ability to streamline our design and development process enabling us to improve existing products and fast-track new product design. Most of our projects require multi-skilled collaboration between different offices and Solid Edge gives us the opportunity to visualise designs, produce rapid prototypes and provide 3-D models for customer integration.

Meta Vision Systems selected Cutting Edge Solutions Ltd because of their excellent reputation, experience and unparalleled technical support.

Meta Vision Systems remains at the forefront of welding guidance technology and we know that our success depends upon designing systems that are practical, fit for purpose, cost effective and give our customers the results we promise.
