

Customer Profile

BROWN & HOLMES (Tamworth) LTD

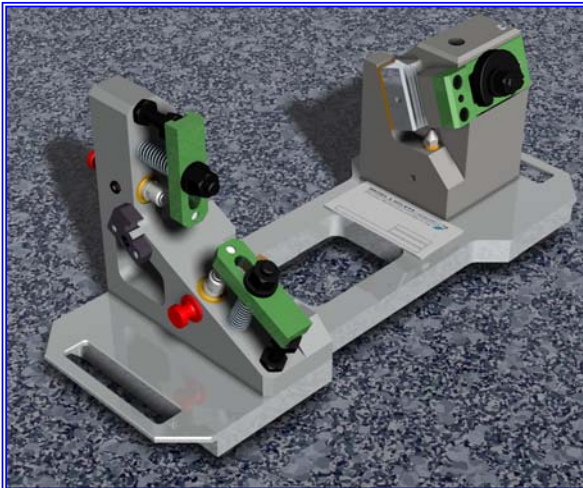

Precision Workholding and Machining

Brown & Holmes Utilise Solid Edge

Since 1939 **Brown and Holmes (Tamworth) Ltd.** have built up a reputation for producing high quality fixtures and gauges for all types of industrial users.

Over the years our expertise has grown to include, special purpose machines, attachments for machine tools, special automated handling systems and precision components employing many modern manufacturing techniques, 3D CAD/CAM & CMM.

The past three years have brought further expansion and additional experience within the company, enabling us to supply standard and special rotary power chucking, expanding mandrels and steady rest packages with full installation available.

Brown And Holmes (Tamworth) Ltd chose Solid Edge to add to our existing CAD systems to enable us to offer a greater level of interoperability with a larger amount of our customers due to the ever increasing demands to accept & provide 3D CAD data

Brown And Holmes appointed Cutting Edge Solutions Ltd as our reseller because of their reputation as Europe's No1 VAR of Solid Edge which provides a high level of support to complement our own high level of customer support.
