

## Cutting Edge Solutions Ltd

Realising potential through inspired solutions

Leaffield Technical Centre, Leaffield, Oxon, OX29 9EF  
Tel. 01993 871001

There are several ways to get to Leaffield via various country lanes. If you fancy your chances then enjoy the beautiful Oxfordshire countryside!

However, if you are heading to us **from Oxford**, we suggest that you **follow the A40** towards Cheltenham. **After approximately 12 miles, leave the A40 at the Brize Norton and Carterton exit** (this avoids the traffic in and around Witney). At the exit, **turn right towards Minster Lovell** and keep going **through the village** until you reach a **T Junction**.

**Turn Right and then immediately left** into the old part of the village. Follow the narrow road down and then **left over the river**. Keep heading straight up through the village **towards Leaffield**.

You will eventually come to a **cross roads** where you need to **turn left through the tiny Hamlet of Field Assarts**. **Continue** carefully along the country lanes **to Leaffield**

### On approaching Leaffield from Minster Lovell (see above)

As you enter the village, take the left turn into **Fairspeare Road**, opposite the village green. This will be **signposted Leaffield Technical Centre** (if you can spot it!). **Proceed out of the village for 3/4 mile** along a dead straight road. You will see the **entrance to Leaffield Technical Centre on the left** just before the road bends and **just before a right turn**. There is currently **no sign** to point you in the right direction from the road so look out for the **small power station** next to the left turn. After turning left, follow the road and you will see flags flying, (we are situated on the MEL complex). If you are travelling **too fast, you will miss the turn**, so please beware!
